Dear Sir,

I would appreciate any information you can send me regarding your research society. Also I would like to know the qualifications needed & the cost of belonging to the society.

Yours faithfully,

Ruby Butler.

Friday, November 13, 1981.

Dear Flat Earth Society,

My name is Gary Pocklington. I am 13 years of age and I attend Handsworth Secondary School. I am writing to you because my class is doing research on the early explorers.

I have an article from the Vancouver Sun that you might be interested in. I would like to ask some questions of your Society.

Why do you think the world is flat?

Why do you think the space shuttle is a fake?

How do you know the world isn't round?

When a ship leaves North America, why doesn't it fall off the edge of the earth ?

Would you please answer these questions, and send a map or diagram of what the world looks like to you . Thank-you very much.

Sincerely,

Gary Pocklington.

My name is Dean Olsen
and I am a grade eight student attending
Handsworth School. We are studying the
Renaissance in our social studies class and
are concentrating on the early explorers.
At this time they through out the old
theories such as the earth being flat.
On this subject I request some information.

Sincerely,
Dean Olsen

Lond Bridge Road,
Dagenham Essex.

Dear Flat Earth Society,

My name is Julie Munzel, I
am thirteen years old, and I attend
Hansworth Secondary School (High School)
Grade eight.

In school we have been
studying the Renaissance,
especially Explorers. I was wondering
what you mean by "our goal is to help
people come out of the herd and
become sane." (Ate) Quoted from the
Vancouver Sun Newspaper November
6, 1981.

We would like details on
the Flat Earth Society if it is at
all possible.

Yours Sincerely,
J. A. Munzel

RM8-2AS

DEAR SIR;

My name is Terri Moore, I am 13 years old and I attend Handsworth Secondary School (High School), and I am in grade 8.

I am in a grade 8 Social Studies class, and we're studying Renaissance Early Explorers. I'm writing this letter because we came up with a question, in class, which was "Is the world round or flat?" I was wondering if you could please send me information on it.

In the Vancouver Sun Newspaper on November 6, I found an interesting quote from you, "the Earth was enclosed within infinite frozen water and outer darkness."

I was hoping you could,

and would, send me information
on the theory of your society,
about the shape of the earth.

Sincerely,
J. D. Moore

Nov. 17/81

Dear Sir,

My name is Lisa McCabe and I am twelve years old. I'm in grade eight and attend Kingsworth Secondary School. If you didn't already know, Kingsworth Secondary School is a high school.

I am wondering if the world is round or flat and why you think it's flat? I think that the Flat Earth Society is a very interesting subject to talk about. I am in a grade eight social studies class and we are studying the Renaissance.

In the Vancouver Sun
Newspaper, November 6, 1981, there
was an article about the
Flat Earth Society. Charles
Johnston had quoted "that
the earth was enclosed with-
in infinite frozen water
and outer darkness". I was
wondering if you could tell
me more about this.

If it is possible, could
you ^{please} send me some in-
formation and details about
the Flat Earth Society.

Sincerely
Lisa McCabe

Dear Sirs:

Recently in our study of Sciences we covered evidences of the earths' spherocity. However, since your opinions differ from our conclusions, we would appreciate any material available stating and explaining your beliefs and evidences on this subject.

Earlier we contacted Mrs. Shenton and she directed us to you. We would appreciate any help you could give us.

Sincerely,

WEST SUSSEX COUNTY COUNCIL

DESMOND ANDERSON MIDDLE SCHOOL

CANTERBURY ROAD, TILGATE, CRAWLEY, SUSSEX. RH10 5EZ

Headmaster : F. KEENLYSIDE, B.A.

Telephone : CRAWLEY 25596

Dear Sir,

We are interested in your theories about the Earth being flat, although we are not fully agreed about them. We wondered if you could possibly send us some literature on the subject, and could you also supply us with the details about, possibly, hiring a representative to give a talk on the subject to some pupils at this school?

Also, have you published any books on the subject, as we may be interested in purchasing some?

The reason we are writing, is because, a few days ago, our schoolteacher suddenly started trying to convince us that the Earth was flat, not round. He then challenged us to find your address. After doing so, he asked us to correspond with you, as he, like us, is interested in the subject.

Dear Sir,

I am a teacher at Summertown Middle School and have always been intrigued by your society. Since the project we are doing this term (with 11 and 12 year olds) is about The Earth I would be most grateful for any information, pamphlets, maps etc., that you could send us.

More than anything else I would be delighted if you could arrange to send us a speaker to tell the children about your theories and research, and to answer any questions that must surely arise.

Hoping to hear from you soon,

Yours sincerely,

Novah London.

Dear Sir,

I am writing a project on the "Flat Earth"
and I would be grateful if you could send
me information about this subject including
all possible arguments against any "Round Earth"
publicans etc. I have enclosed a self addressed
envelope and stamps, thank you.

Yours Sincerely,

P. Smart.

P.S. AS my project needs to be handed in
within a week or two I would much
appreciate it if this information could be
forwarded to me as soon as possible.
