

Flat 1, South Close,
Petite Route Des Mielles,
St. Brelade,
Jersey,
C.I.

Dear Sir/Ms.,

Please forward details re membership of the International Flat Earth Research Society. If membership is open to Channel Islanders, I would be pleased if you would accept us as members. We intend to propugate the facts relating to the flatness of the earth in our local neighbourhoods, where there exists considerable doubt.

Yours sincerely,

Mr. G. Matthews
Mr. R. Callinet

78 Alfriston Rd.
Battersea

LONDON

Dear Sirs or Madams,

We have heard about the Flat Earth Society and we agree most sincerely with your ideas. We would like to become members, we would be willing to come to any meetings and help with your research. Could you please send details of membership to the above address?

Yours sincerely

Denise Herzenshtein and
Jenny Fergie.

Longbridge Road,
DAGENHAM, Essex.

Dear Sir,

When I was in America a few years ago my nephew asked me to try to find details of the Flat Earth Society. I enquired at my local Library but could discover nothing. However, in a recent issue of the Yorkshire Evening Post a reader was enquiring about the society, and the above address was given. If you can give me any details of your Society I should very much like to send them on to my nephew in America.

Thanking you,

Yours faithfully,

(Mrs) W. H. Andrews

Dear Sir,

a friend told me that I should write to the Flat Earth Society for a speaker for our sixth-form society. I'm afraid I'm totally ignorant of what it is you do - do you still believe the world is flat - if not what do you believe? (and why are you called the Flat Earth Research Society?) I would be delighted if you could tell me, and even more delighted if you could come and speak to our society one day after school. I'm sure that they too would like

King Edward VI College,
King Edward Rd,
NUNEATON
Warwickshire.

18th February, 1975

Dear Sir,

My colleagues and I have been searching fruitlessly for the past month, for the existence of an official "Flat Earth Society". Having only recently seen the light, we are keen to obtain information concerning the official arguments for this belief.

Having contacted the B.B.C. and the "Daily Telegraph", it has come to our knowledge that the "Flat Earth Society" went out of existence two years ago, with the unfortunate death of Mr. Skelton. We feel sure that you must be as keen as we are to see this society re-established, if indeed you have not taken steps towards this measure already. We ourselves are keen to become fully-fledged members, and would be pleased to hear if you have any information concerning the possibility of this.

I have already mentioned our desire for official literature concerning the main themes of the "Flat Earth" belief, as for purposes of prestige and affiliation to yourselves, we have a pressing need for recognition of our own society from the true "Flat-Earthists". Hoping for the continuation & success of the society we enclose a twenty pence postal order, in the hope of a favourable reply.

P.T.O.
