

Adna Grade School  
Adna, Washington 98522  
May 15, 1970

Dear Mr. Shenton,

We have several questions for you. If the Earth is motionless, why do we have day and night? Can you prove the Earth is flat? What makes you think the Earth is flat? If the Earth is flat, how can ocean ships go around the world? Why didn't Columbus sail off the edge of the Earth? If the earth doesn't rotate, where does gravity come from? If the Earth is flat wouldn't the oceans run off the Earth edge? If the Apollo flights are false, where do the rockets go when they leave Cape Kennedy? We would appreciate any information you could send us.

Cordially yours,  
Camile Zabin

February 11, 1970

Mr. Samuel Shenton, Secretary  
International Flat Earth Research Society  
Dover, England

Dear Mr. Shenton:

We wrote to you in September, 1969, requesting information about the International Flat Earth Research Society, but have received no reply.

Since that time, we have received more inquiries from students and other patrons of our library who are interested in learning more about your society. Any information you can send will be appreciated. If the Society has published any material, we would also be grateful for a list of those publications and their prices.

Thank you.

*Janet Bergman*

Mr. Samuel Shenton  
24 London Road  
Dover, England.

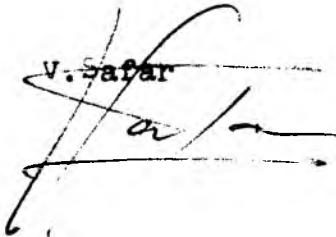

Dear Sir:

Your address was given to me by Mr.Pierre Berton sometime ago. Please forgive me this letter.

Sir, will you be so kind and let me know if you have got any of your members here in Edmonton, or in Canada where I could contact them?

No, I don't believe that the earth is flat, but I do believe something else what you believe, and for that reason I would like to join you. Yes, we were misled by the science.

Sincerely yours

V. Safar

Hon. Secretary  
24 London Road  
Dover, England.

Re:letter of the May 23, 70.

Dear Sir:

To begin with, let me tell you that I am not only ordained, but I was studying as well, and for long long years, and have got several degrees as Ph.D., Ps.D., D.D., LL.D., Ph.M.D.. In fact, I was studying in several different countries and speak several different languages. As you may see it took time for me before I wrote you my letter.

There are very many subjects which I believe in, and would mentioned only few of them.

I strongly believe in Neutronomium 4:2, it means that I believe the Creation of Almighty God(Genesis 1:1, & Ecclesiastes 3:11).

I do not believe in the gravity, as it is the real nonsense(Daniel 2:43), but I do believe in two magnetic poles, South & North.

~~above~~

I do not believe in the rotation of our planet Earth around the Sun(another nonsense), but I do believe in the rotation of Sun around the Earth(Ecclesiastes 1:5-7). For this reason I would like to construct such replica of the creation, as the explanation is very difficult to understand. But it is so.

I do not believe in the space of weightlessness, that's another nonsense, just as same as I do not believe that the sea-tides are caused by the Moon.

If I may go farther, I do not believe that ten commandments were written on the tables from God, (Neutronomium 9:10, Exodus 32:15).

What I do believe is that Darwin and Huxley, both of them knew very well the book of Genesis, and on its doctrines they filled up details, and claimed whole evolution as their own theories, and wisdom.

As I said, I would love to construct such replica of the creation, as there are more things which I believe in, and by such replica I would be able to prove the facts which have to be known, before those Wise Men will destroy whole creation.

~~Yours sincerely~~

V. Safar

~~at 100~~

still thinking in terms of planetary movement of earth; will have the greatest difficulty in adjusting your mind that the earth is /has unknowable dimensions) and is without movement. We occupy (in our time) only a very small area at the base of one of the "pits" of which there are very many... (many mansions... dwelling places: some occupied by evil forces (Eph. 5:12)... "against the superhuman forces of evil in the heavens" (N.E.Bible)

Rev: V.Safar,  
7042 7024-105A Street  
Edmonton, Alberta,  
Canada.

July 3 - 1970

Dear Rev: afar,

6<sup>1</sup>  
I was very pleased to receive yours of the 8<sup>th</sup> June. Only a very few ministers write and then turn away when confronted with the astounding statements of the Bible and The Christ. For this reason alone I welcome your "deep searching" letters and note that al hough you have become involved with modern thought as your heresies show, yet you retain strong links with the now derided statements regarding the creation. Our letter contains so much I only wish that we could talk together. However, maybe I can deal with one or two points regarding the creation which will lead to some help towards your twice mentioned "construction of a replica of the creation".

My conception showing "the tomb of the earth" is, I would say the chief thing which has been "TAKEN" from us. Such concept fights against the atheistic upholders of the Copernican solar theory... simply I would suggest ... the Darwins, Huxleys, Toyals, and Bondys, in their thousands are then able to dodge the point of a Creator and HIS just judgment for the serial and breaking of the Ten commandments about which I would like to say a few things perhaps in a later letter.

"areseth (Gen:1) reads:- "in a FLOOD or great water" God created the "heaven and the earth" the record then un-lds. But please remember Christ at His ascension "had to ascend THROUGH ALL HEAVENS to the highest (Eph.4:8) heaven" he had previously "descended" to the "lowest" heaven or level. He learns that these "heavens" are "heaved-up" structures IN WATER. Ours has been collapsed (Gen: 1 etc: and at the Flood. The church of the land in His service states:- "the waters that be above the heavens" (A great subject... any refs. throughout script. The opposition to the accepted lie is profound. Or you Mr Safar still

(2)

Still thinking in terms of planetary movement of our earth; will have the greatest difficulty in adjusting your mind to the fact that the earth has unknowable dimensions and is without movement. We, (in our time) only occupy a very small area at the base of one of un-habited ~~the~~ "Pits"... the many mansions.. dwelling places: some we understand (Apk: 6/12) occupied by evil forces... we have to struggle against the suburban forces of evil in the heavens (N.C.Bible).

Planet earth is supposed to have THREE motions

- (1) Up to 1,000 odd miles rotation.
- (2) Nearly 20 miles per second on supposed orbit.
- (3) Whole solar system :20 thousand miles per hour towards the Star Lyra.

Out of such movement some indications should be findable.

The only movement comes from God at the time of the restoration of all things... that means the replacing ~~out~~ of the broken FIRST vast land mass.

I will await your considered reply trusting that this has not been too much for a start.

You're very sincerely

S.Shenton,  
Hon. Sec.

Seeking to find a few truly seeking in turn the truth which has been evilly withheld from us as our children.

P.S. July 4th 1970.

I note that I have not mentioned the reason for the slight delay in reply. Added to my long continuing heart condition, I have wacking great ulcers down each shinbone. These have added to my scant sleeping, thinking, or reading. The vile stench and the weeping makes me wish to hide away; if it had not been for my wife's constant attention I don't think I could have stuck it!

Mr. Samuel Shelton  
98 Lewisham Road  
River, Dover, England

Yours Mr. Shelton,

We, the grade 6 class at Saxford, Manitoba, are interested in the Flat-earth Society. We would like some information on it.

We would like to ask you some questions:

Why do you believe the earth is flat?

Where does the earth end if it is flat?

Do you think you'd fall off the earth if you travelled far enough?

Please send us a picture of what you think the earth looks like.

We would also like to know how many people belong to the Flat-earth Society.

Could you please reply as soon as possible?

Thank you!

Yours truly,  
the grade 6 class.

Flat Earth Research Society,  
London, England

Gentlemen:

I have written to you prior to this letter. I have given several explanations about the Earth and other celestial objects to you.

I have some more:

The moon was an independant planet before it came within the Earth's gravitational pull. The moon was made by vortical motion. This accounts for the craters. There is an atmosphere on the moon.

Our solar system is a huge magnesium atom.

Remember the landing on the moon by American Astronauts? That was the biggest put-on since Gensis Kahn's funeral!

You cannot tell the difference between going up or going down in an elevator. At 5 seconds before liftoff (as soon as the booster rockets started roaring away) the capsule containing the astronauts dropped

through the hollow Apollo missile. The capsule continued to travel down, about 1/2 mile down. (As far as the Astronauts were concerned, they were traveling up.)

Meanwhile, the Apollo travelled up into space. The astronauts made their landing and exploration on a fake Moon. They were then transported underground out to the Pacific Ocean and were taken to the splashdown area by submarine and fastened to the ocean floor. Up in space the capsule (Completely filled with lead) came falling through the sky. When it hit the water, it immediately sank. Simotaniously, the capsule containing the astronauts started floating up to the surface of the ocean.

Please send me some information about your organization and requirements for joining it.

Again, If any of this is released to the public, I will sue.  
Please contact me.

Sincerely,  
Michael Schofield

The Flat Earth Research Society  
London, England

Gentlemen:

I have proof that the Earth is flat. I know how thick it is. (Three digits). I can account for the pictures of the Earth as round.

The atoms near the North Pole, for example, are 3 billion per square inch. At the South Pole they are 1 per square inch!

Standing at the South Pole you cover about 1,000,000,000,000,000 times as much space as a person on the North Pole. You have no more atoms, just more space inbetween.

Along with Einstein's theory of light being bent and magnetism, the Earth appears round.

The moon travels above the Earth in a circle. Magnetism hides it. (See diagram 1)

The sun has about as much power as a small electric power plant. In space a planet weighs absolutely nothing and is held in place by a magnetic shell. To move a planet takes about as much power as lighting a light bulb.

All the planets are flat! They all fit onto a shell of magnetism. (Diagram 2)

The Earth is 528.38 miles thick.

The shell of the Earth and the sun are contracting rapidly. (Diag. 3) The objects are pressed against the Earth by inertia. This accounts for gravity.

Because the Earth is in a round shell, it has an upward curve, I am in the process of finding that curve.

I would like to have some information on joining your club. I'm 28 and a science fiction writer.

I'll sue if this is printed without my permission.

Please contact me.

Yours,

Michael Schofield  
250 Moseley St.

Dear Sir,

We are a grade 5 class in Silver Creek Public School in Toronto Ontario. We would like to ask you some questions about the Flat Earth Society. When our class was reading a story called "The Riddle of the Universe", we heard about the Flat Earth Society and wanted to know more about it.

Approximately how many people are members of the Flat Earth Society? Who started it? The question that concerned us most is - Why do they think the earth is flat despite of discoveries of modern science?

Where do you hold your Society meetings in Dover? We would be most interested in any other information you could give us about the flat Earth Society.

Yours very truly

Dear Secretary,

A serious-minded group of young men at the school I teach at (Manchester Central High School for Boys - Kirkmanholme Lane - MANCHESTER M12 5GL) are much interested in the views and rationale of the Flat Earth Society especially in the light of lunar exploration.

Would it be possible for you to arrange a visit by one of your members to the school? The idea would be for the visitor to give an explanatory talk and answer questions. If such a visit is not arrangementable, could you please send me relevant information and brochures? I shall present your material straight, if this is the only contact we can manage with you.

Best days for a visit: Monday (2 sessions of 40 minutes) and Friday (last period of the day: 3.5-3.45).

(Yours sincerely,

Alan Simpson.

The London Flat Earth Society  
London, England

Dear members of this society,

We are two eighth grade students at Tuckahoe Junior High School who are studying astronomy. Somehow we found ourselves talking about your society today, and find your beliefs about the earth quite interesting. As the two of us don't live in London, so we could attend a meeting, we would like to ask you to send us some information about this society. We would like to know your society's history, number of members enrolled, and how you would explain for Magellan's trip around the world, Columbus' voyage to find America, round the world plane trips, and the photos taken by the astronauts from space. Any photographs or information would be deeply appreciated. Enclosed is a self-addressed stamped envelope for your convenience. Please send us this information as soon as possible, as we are truly interested in the London Flat Earth Society. Thank you very much.

Sincerely yours,

Miss Nancy Singer  
and  
Miss Susan Crane

SL

34, Shepherds Green Rd.,

Edgbaston,

Birmingham, 24.

30th January, 1969.

Dear Mr. Stanton,

I am writing this letter in the hope that you are the Mr. Samuel Stanton, secretary of the International Flat Earth Research Society. If you are not please disregard this letter and forward me the stamp addressed envelope with any knowledge you may have of the whereabouts of the International Flat Earth Research Society. I am writing to you because I saw the name Mr. Samuel Stanton of Dover in the 'Daily Mail,' and obtained the address from Directory Enquiries.

We have just set up a Debating Society at my school (Marsh Hill Boys' Technical School). One of the motions (which I am proposing) is that, 'This House believes the world is flat.' I am hoping that you will be able to forward me plenty of information

(2)

to why the earth is flat.

I hope you are well to let me have this information,  
as I am anxious to obtain as much as possible, and  
would appreciate an early reply.

Yours faithfully,

P. A. Hadley

34, Shepherds Green Rd.,

Edgbaston,

Birmingham, 24.

6th January, 1969

Dear Sir,

We have just started a Debating Society at School (Marsh Hill Boys' Technical) and I am speaking for the motion that, "This House believes the earth is flat." I saw an article in the Daily Mail about you explaining the article & slight proving the earth was round. I wondered if you could supply me with information concerning that the earth is flat. I heard you (at least I thought it was you) on 'Late Night Extra' quoting examples like the Nile etc. I would like to receive information like this, as much information as possible as why the earth is flat.

Hope you will be able to fulfill my request.

Yours faithfully

Dear Sir:

We are interested in The Flat Earth Society.  
We, being my roommate and myself. We heard a broadcast by a C.B.S. news broadcaster on your organization and your dwindling membership. Being believers in the flat pancake theory we wish to let you know you have support in California U.S.A.

Cordially,

*Mike Sandberg  
Roy Johnson*

Mr. Samuel Shenton  
International Flat Earth Research Society  
Dover, England

Dear Mr Shenton:

In the past months, newspaper articles have stimulated my interest in your society and its beliefs. Most of them are written with a tone of ridicule. I have not yet formed an opinion on whether or not the earth is flat. Having investigated the case presented by astronomers, I feel that in order to reach a fair and logical decision as to the earth's shape, I must hear the other side of the story, in a manner of speaking. Therefore, I would be most appreciative if you would send me some imformation about your society and its theories.

Respectfully,

Neil Sandell

England

Dear Mr. Shenton:

I recently read a report of your organization's newspaper, and am very interested in learning more of your Society.

I wonder if you would be so kind as to send me an application form for membership and information regarding membership fee and dues.

Thank you very much.

Very truly yours,

Alfred Sands

Dear Mr. Shenton,

My name is Gail Sangpeal. I'm in the sixth grade. I would like some information about the flat earth, after (booklets) reading about it. My address is below. Thank you.

Sincerely yours  
Gail Sangpeal

Dear Sirs,

October 14, 1969

Our 8<sup>th</sup> grade science class would like to have some information on your society. Also, if there are any books which have been published about your club we would like a list so that we could read them. Any pamphlets or folders you have would be perfect.

Thank you for your cooperation.

Yours truly,

Barbara Larson

Mr. Samuel Shenton  
International Flat Earth Society  
Dover, England

Dear Sir:

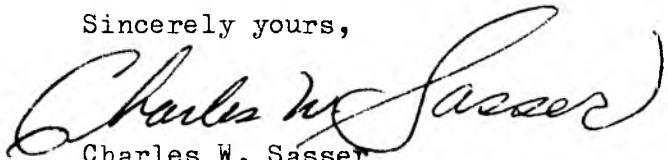

I am an American college student and have read with interest recent accounts of how the space age has affected your organization's theory of our planet being a flat one.

Though I do not agree with you, I most certainly respect your right to the belief. As an author of one book and many articles, I have dedicated my life to the study of man--his culture, aspirations, beliefs and desires. Would it be convenient for you to perhaps explain to me more fully your theories of a "flat earth", as well as give me some background on your organization?

I shall take up no more of your time, but shall await anxiously your reply.

Thanking you in advance for any inconvenience, I remain

Sincerely yours,

Charles W. Sasser

Dear Sir,

I have become aquainted with your group only recently. I heard of it through one of your members. Ever since it has fascinated and intrigued me beyond a point of normalcy. If you could possibly send me some information I would be greatly indebted to you.

Some of your ideas still baffle me and maybe you could clear them up for me. One example: If the earth is flat how did the Apollo astronauts get a picture of the earth being egg shaped?

Sincerely,

Mark Savage

Dear Sir:

My friend, John Mepham  
and I are very interested  
in your organization.

From time to time we  
read about it in the  
daily newspaper. We would  
like to receive information  
on how we may join your  
organization and what is  
involved in it.

Yours truly,  
J.L. Scobie

Dear Sir

my French master, who believes  
that the earth is flat, explained  
of the existence of the Flat Earth  
Society. I originally thought that  
the earth was round. Could you  
please send me some information  
about your society.

Yours sincerely

C. Senter (miss)

Dear Mr. Shenton

I would be very interested in receiving any information available on the Flat Earth Society. The idea sounds most intriguing.

Sincerely,

James W. Lever
