The Flat Earth Society
c/o Samuel Shenton
24 London Road
Dover,
Kent England.

Dear Sir:

I have just recently heard of your society. I find myself somewhat intrigued by your theory. I am also interested in the means by which you derive such a theory.

I am a student, now on vacation from the University of Illinois; I would appreciate any information that you could give me about your organization.

Thank you very much.

Sincerely yours,

James Shaughnessy

Dear Sir or Madam,

I am writing on behalf of the Halifax Branch of the British Association of Young Scientists to enquire if there are any members of your society in our area who would be willing to debate on the motion "This house believes that the earth is flat." One of our members would oppose the motion. If there is a member who is willing to take part could you please put me in touch with him or her, so that a suitable date can be arranged.

I hope that suitable arrangements can be made, as we all feel the motion will make a lively debate.

Yours sincerely
Gillian Stead.
(Secretary).

Gentlemen:

Our class is presently doing a study on the earth, and I wondered if you could possibly help by supplying some information for me.

Any information you could send me would be helpful.

Thank you very much. My address is: *214 Ashwood Drive*
Avon Lake, Ohio, 44012
U.S.A.

Yours truly,

Valerie Shields
Student, Westview Grade School

Dear Mr. Shenton,

I am in 7th grade and attend Hobart Junior High School. In my social studies class we get the "Current Events" a few weeks ago there was a piece in one ~~city~~ ^{at} article about the "International Flat Earth Research Society." This interested our class and I volunteered to write to you and find out a little more about your society. Please write and let me know of any charges. Thank you.

Sincerely,
Julie Shinabarger

Flat Earth Society
London, U.K.

Dear Sirs:

I represent a group of physicians who have read with interest your views on the physical reality of the world in which we live. We view with alarm, as you do, the terrifying hoax being perpetrated by governments and press alike. We agree that exposure of this cruel trick is the only way to terminate it. To this end I have written this letter to request any informational materials available from your organization, and especially information as to how we can apply for membership in order to better carry the fight in our area. Please forward such material at your earliest convenience to me at the above address.

Sincerely,

Lawrence S. Jackman

18 MAR 1969

Dear Sirs:

I'm a student at Azusa Pacific College in California studying for a Bachelor of Arts degree in European History. I'm writing to you to ask a favor. I would like to do my research paper on the foundation and reasoning of the Flat Earth Society.

I hear about your organization on the news concerning a letter you sent to our President in reply to our last space flight.

I would appreciate greatly any information you could send me concerning your organization.

THANK YOU SO VERY MUCH,

Alan Schwerdt

SWISS TELEVISION. London Correspondent: Th. Haller
44 Princes Park Avenue, London N.W.11, Tel. 455 7074.

London, 14th Jan. 1969

Dear Sir,

I am writing on behalf of the Swiss Television Service to ask you if you would be prepared to answer a few questions in a filmed interview about the Flat Earth.

Unfortunately I have lost a number of days in trying - without success - to find your address or a telephone number and now time is getting short. A cameraman will arrive for the coming weekend, perhaps in time to film the interview on Saturday, 18th. If he cannot make it for Saturday we would be prepared to come to Dover on Sunday but I fear that would not suit you. The last possible day would be Monday, at any time convenient to you.

Should this letter reach you not later than Friday morning I should be very grateful if you would kindly give me your answer to our request by telephone (reverse the charges).

Looking forward to a favourable reply, I remain,

yours sincerely

Th. Haller

To, the President, Flat Society of England
Respected Sir, (London)

Most humbly and respectfully,
I beg to say the following few
lines for your kind and indulgent
consideration, as under:-

29 JAN 1969

That your society believes
that the Earth is flat. In this
connection, I may add that I have
got a new approach that the Earth
is stationary and also that it is
not round. It is flat and square

The matter may be proved through the
medium of the following subjects
Through mathematics, Astronomy,
My Astronomy, My Geography, Geology,
Botany, Physics, Theology, medical
science and although through practical
demonstration that the Earth is stationary and
sun moves round the Earth by all means, with two
motions. I hope your society may like to help for
the nation, for the truth that the Earth is stationary.
Truth is alive. I have not passed M.A. I am a poor fellow,
an Indian. It is my life object. I may continue fight
against the might for the Right. Earth is stationary, that
Earth is flat. Earth is not round in shape, but
it is square - Hoping to hear from you soon and
thanking you in anticipation.

Yours faithfully
H. Sri Ram Sharma

Dear Sir,

I should be very interested to have some details about your Society. I should like to know some of your points of view. I am interested in people with unusual ideas and who adhere to their ideas even in the face of enormous opposition. I shall be most glad if you would send me any literature you may have.

Sincere regards

F. C. Shipway.

April 15, 1969

Dear Sir:

I am a student at Tri-State College, Angola, Indiana and I am required to write a research paper before May 18. The reason I am writing this letter is to obtain as much information on the Flat Earth Society as possible. Thus far, I have found almost no references concerning your organization. After searching libraries and writing a few other sources of references, I was finally referred to you.

It would help me a great deal on my term paper, as well as my own knowledge and benefit, if you could send information concerning your organization. Please try to honor my request. My research paper is to be no less than seven pages. I appreciate any help you can give me. Thank you.

Sincerely,

Morris E. Shope

Mr Shenton

Dear Sir

In one of our daily papers there was a short statement of your Society "The International Flat Earth Research Society" being a bit disturbed after viewing pictures taken from Apollo 8. We are an unorthodox christian body & firm believers in the flat earth, because the Scriptures definitely teach such. We also had a book from America, some years ago, which gave many explanations also to prove the earth is flat & not a spinning globe. Does your society believe in the Scriptures for that belief or what do you base your belief. I will be very interested to hear from you. I do not have your full address but am hoping this will reach you.

Yours Sincerely
(dl's) J. J. Smith

28 MAR 1970

10.2.9

Dear Mr. Shenton,

Things are not always what they appear to be. Perhaps, the earth is flat.

An article in the Dallas Morning News said that the Apollo 8 flight has caused a decrease in your membership. I hope this letter reaches you.

Please send me information concerning your group.

Truly yours,
Dan Smith

Over,
Kent.

Dear Sir,

I was given your name by the London Times that you are the organiser of The Flat Earth Society of Great Britain.

Socio is an organisation which meets every Tuesday evening for the 19-25 age group. We would very much like a speaker from your organisation to come to talk to us.

The meeting will take place in north-west London on June 24th 1969. We are not yet able to provide you with the address but this will be supplied as soon as possible.

We look forward to hearing from you.

Yours faithfully,

HELEN MENDOZA
Secretary
